# **Las Vegas Hotel Now Offering Comprehensive Wireless Infrastructure**

NORTH LAS VEGAS, NV—The Aliante Station Casino + Hotel, a \$662-million, 202-room property that opened here in November 2008, is now providing a comprehensive in-building wireless infrastructure and communications system for its guests and staff through Sprint and MobileAccess.

The wireless infrastructure exists throughout the hotel, including its 14,000 square feet of meeting space, six restaurants and multiple entertainment venues.

The new infrastructure is designed to ensure nearly continuous wireless coverage no matter what device a guest or staff member is using. The system has capabilities for all major cellular phone carriers, in-house two-way radios, Wi-Fi, voice over Internet protocol and public safety radio.
